

OneID® AGE VERIFICATION

Age Verification from OneID® lets your customers **confirm their age in seconds.**

Ensures that your customers are over 18 years of age prior to supplying age restricted goods or services.

The OneID® solution is **100% digital** with unequalled coverage. It can verify the age of your customer, anywhere in the UK, any time with circa 50 million UK users enabled for near instant identity checks.

Every transaction is protected by the **most advanced counter-fraud measures.** Bank-grade authentication, fraud detection and biometric security protects your business from fraudulent activity.

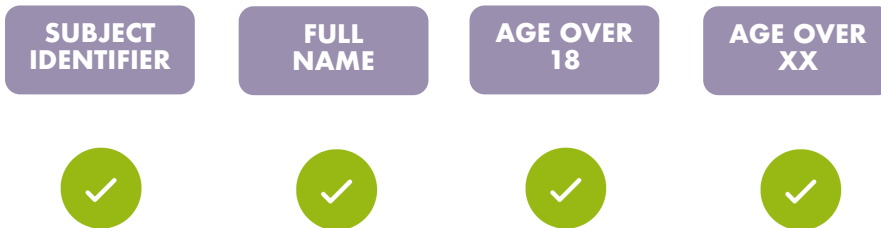

It is a simple, fast, and secure way of confirming your customer's age and identity in real time.

Protect your customer's privacy with no over-sharing of personal information, no document uploads, no live selfies and most importantly, **no hassle.**

○ PRODUCT ATTRIBUTES

OneID® has developed its technology to offer a range of Age Verification products that provide you with real-time information about your customers to meet your needs.

The OneID® Age Verification product allows your customer to confirm their age and identity, quickly, securely and with minimal friction whilst providing you with the confidence that they meet the age requirements for the purchase or service.

○ HOW OneID® AGE VERIFICATION WORKS

Confirm your customer meets your minimum age requirements in a **simple, secure and fast way**.

OneID® facilitates the capture of the required details of your customer (the data subject) and authenticates them in real time. Our Age Verification product is designed to complete age checks silently, with the least amount of friction for your customers. Your customers simply enter their name and address details at checkout, and we'll do the check for you in the background.

The Age Verification journey will be able to complete the silent check for the majority of your customers, but for any check that can't be completed your customer will simply follow the OneID® journey. This ensures you remain compliant on every transaction with **near zero friction added to your customer journey** for age verification.

The data is sent from your customer's bank to you via OneID[®] with the customer's consent. Only the customer can agree to this as they are the only one who can log in to their account. All bank data, including identity details are secured by the bank using some of the strongest security available.

○ OneID[®] AGE VERIFICATION BENEFITS

- Age Verification works in real time, providing verification that an individual meets a minimum, or specific, age requirement within seconds
- Age Verification also confirms the name of the individual for audit purposes
- **100% digital**, with no need for document uploads or live selfies
- Age Verification allows your business to know that your customer is of a specific age before they buy an age restricted product or service
- Our simple age verification process protects your customer's privacy, whilst delivering compliant age checks

○ EXAMPLE INDUSTRIES
